

# The big business marketplace

Business for sale more than 15 years

---

ID 21771

## Offer Corporate sales, firm sales, sales **Cellar refurbishment construction**

For reasons of time, we offer a newly founded specialist company in the field of basement and floor sealing technology. The industry is very interesting, as there are many older houses that currently have a great need for refurbishment, the number will continue to increase in the next few years.

So a future market. With good time spent, M.E. can live well from this company, or also operate as an additional business on the side.

We work with an innovative 5-layer technique, which is applied from the inside without the need for complex excavation from the outside and at the end forms a water-impermeable "white tub". The system has very good references and has been used in the German Bundestag, BKA, Federal Press Office and at the Brandenburg Gate, among others.

The system is very easy to use so also for lateral beginners very suitable. Appropriate training is, of course, included.
