## **Production and online trade of armrest covers**

I'm selling a product with high potencial.

The three product series of the armrest covers out of terrycloth and in different colors are universal fitting to armrests of camping chairs, seats of mobile homes and office chairs. More models/drafts/ideas are available.

The fabrics are from various providers. The goods are produced from a sewing company and offered in my own onlineshop.

The camping sector in particular, and with it the accessories trade, is experiencing steadily increasing growth rates. Potentials are the international trade (currently only sales according to DE, NL and AUT), integration into the range of a larger company and thereby mass production with cheaper prices or contracts with wholesalers.

The company's trademark is registered. Customer reviews are very good. I have registered 3 domains. Inventory is available.
