Offer Liquidation, Operating dissolution **Softwareprogram**

This program is a highly developed specialized program for presenting different types of data in graphic form. The integrated vector graphics editor allows you to add objects and captions for illustrations and descriptive texts.

It works in an object-oriented manner: The charts themselves are made up of (vector) graphics objects, settings are entered in the context menus.

It is used not only by graphics professionals but also by scientists and market researchers.

Operating systems: Windows 10 / Windows 95/98/NT/2000/XP/7/VISTA and OS/2
