Sales espresso screen carrier machines

The company operates an online shop (Magento) with various very attractive top-level domains (international) and specializes in the distribution of high-quality espresso screen carrier machines, mills and accessories.

The company is one of the top retailers in Germany and also houses exclusive product lines. In the meantime, customers are also increasingly reaching throughout Europe and even China.

We had originally stopped the company for sale before the start of the and then temporarily halted the sale because of the pandemic. Business planning and valuation therefore come from the prior phase .

At the time, we had assumed that the company could be developed full-time management by a successor to a sales target of more than 500 TEUR within 3 years.

Since the beginning, the owner had more time available for the further development of the company and accordingly "given gas".
