

The big business marketplace

Business for sale more than 15 years

ID 22050

Offer Corporate sales, firm sales, sales

Products for people with limited mobility

The company develops, produces and sells stocking and undressing aids as well as walking stick holders. The products are protected by several patents, EU utility models, EU design rights and aid numbers and are unique on the market. So far, sales have only been carried out via the company's own web shop, but the market potential of the products is enormous across Europe, if the buyer manages to organize series production and sales. The contribution margin is exceptionally high.
