Offer Corporate sales, firm sales, sales

## **Metalworking**

Production, delivery, assembly as well as maintenance of crane systems, gate systems, shelves incl. heavy duty and automatic shelves as well as many maintenance and repairs in the industry.

We carry out this work in small and large companies according to agreement and orders in a framework partly also at weekends or at night in case the normal working hours disturb the production process. As a result, we have acquired a very good and high reputation among our customers with our small company. If desired, the customer base could be substantially expanded in a relatively short time. But for this you would need additional and good personnel that would carry this with you.
