Manufacture and distribution of rim tables

First, things are different.... and secondly when you think...

Unfortunately, this proverb of Wilhelm Busch is true more often than one is fond of. For health reasons, I sell the fully developed concept designer tables. It is suitable for part-time work as well as for supplementing an already existing self-employment (e..B. metal construction companies or companies active in the furniture or automotive sector) The standing table looks simple, but it took some thought and also failed attempts until the product was really round. This experience as well as of course the existing 600 rims. secure the business idea and ensure that no real competitor will emerge or has a chance so quickly. The rims come from the Porsche Edeltuner Techart, are new and unused. The rim can also be equipped with a leather coat instead of a car tyre for special purposes.
