Business for sale more than 15 years

ID 23039

Offer Corporate participation, firm participation **Solar panels**

In 2022, we will start producing and selling small photovoltaic power plants.

The process patented by us enables a 50% higher energy yield than was possible with the previous photovoltaic systems.

The systems are ideally suited for one- or two-family houses, and can also be used for commercial properties of any size due to their modular design.

It can be assumed that the product is of course very easy to sell due to the constantly rising energy prices, especially since it represents a unique, high-yield investment for the customer, in which he can easily generate double-digit returns.

We offer a small number of investors to participate in our newly founded company and to create a flourishing company together with us.

Minimum deposit € 20.000,-
