Expansion of camping vehicles

Search participation for a unique business idea.

I have been building vans privately into camping vehicles for 10 years. In today's world, however, new panel vans as campers cost over 60000eurs. My goal is for everyone and the small purse. Purchase of used commercial vehicles and conversion in a sales price up to 20000eur with exhibition space

So far, there has been great interest in the price range and would therefore like to turn my hobby into a profession because I am not familiar with the entire expansion. For this purpose, a minimum of 50,000eurs is missing as start-up capital
