

The big business marketplace

Business for sale more than 15 years

ID 23666

Look for Corporate follow-up, firm follow-up, follow-up **Craft Business / Mechatronics Engineering Office / Electrical Engineering**

Looking for a small company with a maximum of 5 - 10 employees, which I can take over in the course of retirement succession. Also a design office in the field of mechatronics, automation technology or electronics. Or even a company / craft business in the field of electric drive technology, energy supply, photovoltaics etc...

It would be important to me that the previous owner is still available to me for a while for training and thus the change of ownership goes smoothly.

About me:

I have several years of professional experience in mechanical and plant engineering and am currently working in aeronautical engineering.

In all these professional stations, I was able to gain important, different experiences in different areas of the company. From small businesses to medium-sized companies to global corporations.
