Gardening and landscaping

Looking for landscaping farmer, gardener or similar with whom I can build a company. He/she should be able to take care of planning, procurement, organization, billing, accounting, etc., but also be happy to work on construction sites and in gardens.
I am a trained bricklayer and have been working independently as an excavator driver for 15 years, mainly in civil engineering.
My company building with vehicle hall and office space, as well as outdoor storage space is located at the southern tip of the Ammersee. This is where the districts of Weilheim-Schongau, Starnberg and Landsberg meet.
On machines are 2 mini excavators, skid steer loaders, trucks 3.5t, trailer, vibratory plate, rammer, garden tiller, brushcutter, chainsaw and much more. available.
My company last worked in cable construction, my partner retired for reasons of age. Cable construction is very stressful, always block the road, always dig at the supply lines.
