Offer Corporate sales, firm sales, sales

Car sharing website for electric cars

I offer a ready-made concept for a car sharing model including a website. Customers can request a car via the website or offer a car themselves. Website is live, but is not yet advertised, so there are no significant sales yet. Could be pulled up quickly.

Complete levy or levy with further participation is conceivable.

I don't get around to pursuing the project myself.

If you are interested, just get in touch.
