## Oat bars

Hello, In 2020 I founded the company as a pharmacist that offers vegan, functional superfood bars (functional food) and I have reached a point where I as an individual have reached my limits. That's why I want to sell the company! To a corporation or an interested party like you who is familiar with the topic, understands my innovation and can better position the function and effect of the unique bars with a larger marketing machine on the market. So far I have been able to place myself in more than 200 LEH branches, several markets, some pharmacies and petrol stations. And my online store has resulted in more sales. The bars were also presented at a wide variety of events, such as the ISM in Cologne or the Vegginale in Hamburg.

I would hate to let the brand just disappear like that, I put too much heart and soul into this company and I see a lot of potential in the bars. But I lack the necessary manpower and the associated marketing. I have many other ideas regarding the bars and the future-oriented functional food sector and would be happy to share my thoughts with you. As a product developer, I serve a wide variety of inquiries about dietary supplements, cosmetics, medical products and food. This means that if you wish, I would and could continue to get involved and ensure new innovations. The company is to be sold by the end of the year.
