Offer Franchise, license

## **Video First Online Dating Platform**

Franchise your own "Video First" dating platform and start your own business today.

You market and monetize a unique online "video-first" dating platform in the country of your choice. Instead of boring pictures, users can browse through entertaining and charming videos that show the personality of each participant. Desktop, iOS and Android are supported.

The revenue generated in your region goes to your account. There are two revenue streams for the franchise participant.

- Through in-app ad videos that are played.
- Through 3, 6 or 12 month subscriptions.

What is our job and what is your job?

We provide, maintain and operate the platform and you take care of the marketing and monetization in your region or country.
