Delicatessen, Organic Oil Manufactur

We started the Organic Oil Manufactur at the end of 2020, have managed it successfully so far and are now selling - ready to start immediately - at the best time of year - just in time for the Christmas business.

The object of the business (currently) is: processing of oilseeds and nuts, production and distribution of cold-pressed edible oils, their products and by-products, as well as other foodstuffs, food supplements and cosmetic products (the item can be supplemented or changed by the buyer). However, the shop offered for sale initially refers only to the luxurious cedar nut oil – a special oil that is not widely known (in the masses), but is already very popular among true gourmets.

The products are positioned in the premium to luxury segment and can be sold to wealthy and high-net-worth customers.
