## **Painting company and finishing trades**

Top equipped painting company with a very good customer base, specializing in private customers and private homeowners. In addition to the classic painting work, the portfolio and thus the equipment includes drywall, tiles, assembly work and much more. The commercial building (a complete rear building) can be rented cheaply. Office, warehousing, changing area are integrated. A loading and unloading zone is marked on the road. Currently, one employee and one trainee are still employed, who are retired at the time of the handover, or (trainee) have completed their training. This means that you can start and expand on your own. The size and facility is designed for up to 6 employees. No scaffolding. The mentioned price does not include a company vehicle. This, as good as new L2H2 Renault Master can be compared to the previous year. Schwacke estimation.
