Look for Corporate co-operation, firm cooperation

APP Development

We are an expanding software company founded 4 years ago that offers a personalized white label app builder in the B2B SaaS sector. We have about 500 customers in the DACH region

We are looking for a strategic and operational partner in the software sector who is active in the field of development and takes care of this for our apps. On the one hand, there is the area of app programming and the creation of white label app copies.

Since we are not programmers ourselves, we have been working with an external software agency so far and would like to enter into a new cooperation model, which is a win-win situation for both sides.

Co-operation

Region 40, Germany

Entry in own name
