## Metal processing

Photos - logos - inscriptions - inventions - dedications - drawings, etc., can be reproduced visibly and permanently for eternity. (Keyword: "Oil Painting 2.0"). Millions of customers with their individual templates are eligible.

It is a highly emotional and very positive process to have the most important motif in 24 carat gold around you.

An individual gold picture reminds everyone of the history of the motif in professional and personal environments and reminds all generations of the times when it was created. Gold plays with light and shadow and the motif appears incomparably mystical and extremely exciting. It captivates viewers forever and is the most exclusive species in the world.

We produce individual reproductions of every type of image. These are manually and technically detailed engraved into cast precious plates.

Each of the millions of pixels in the templates are carved out of the solid stainless steel material by craftsmanship and by master craftsmen. The procedure is protected.

Every production ends in the 24-carat fine gold bath that seals the system on all sides several times. This means it lasts forever. Pure gold never changes, is completely stable and gives the motif the highest quality

shine emotionally and with great attention to detail.

We only produce one-off products in an individual format. Every customer receives a globally exclusive, unique piece of their template. The production time per motif is approx. 3 months.
