Special machine construction

Special machinery manufacturer in the field of recycling special building materials

The company is for sale as part of the planned succession plan. As a technology and market leader in machines and systems for recycling insulation materials, the company is very well positioned on the market.

The product programme includes complete systems and machines as well as special machines that are specially developed and manufactured according to customer requirements. Its global customer base includes leading manufacturers in the insulation industry and their suppliers.

Thanks to its international customer structure and leading technology, the company has an outstanding position. Further technological developments and an expansion of the sales organisation will allow a further increase in turnover and profitability.

The company has extensive technical expertise, a complete range of workshop equipment, office space including a social room totalling 200 m², modern hall infrastructure, 3 halls with 5 overhead cranes, a total production area of 2,100 m², an additional 3,000 m² of parking and storage space on a site area of 10,000 m².
