Look for Corporate participation, firm participation

Agricultural Engineer

I have a degree in agricultural engineering with a specialized focus on economics and management. My professional career has been characterized by an in-depth examination of IT topics within the agricultural industry

I am looking for an opportunity to participate in a company where I can contribute my acquired skills in the field of agricultural economics and IT. My goal is to work in an innovative environment that recognizes and promotes the importance of digitalization in agriculture. I not only have in-depth knowledge of agricultural technology and economics, but also practical experience in the application and integration of IT solutions into company processes.
