## **Organic compound feed production**

The young company specialises in the production of organic compound feed for agricultural and commercial livestock farmers in a high-sales region (Upper Palatinate). Production capacity of 5,000-10,000t is in the status quo and can be expanded. Due to the absence of the managing partner, who took over production and sales, the operation was paused and an expert co-partner is being sought to take over these areas. Break-even has been reached, and financing is secured by shareholder funds. Good entry point for millers, experienced farmers, etc.
