## **Fresh ice cream manufacture**

We are looking for a master franchise partner for Spain for a Europe-wide franchise concept in the production of genuine Italian fresh ice cream.

The system is based on a specially patented ice cream machine from an Italian manufacturer as well as sustainable and organic certified ice cream mixes.

No (usual) storage with large cold rooms is required. There is also no need for permanent cleaning as is usual with soft ice cream machines.

All hygiene protocols are documented by the smart controllable machine.

We look forward to receiving your inquiry for detailed system descriptions.
