Vehicle interior, paint and body repair

This specialist company with the areas of car paint shop, vehicle interior fittings and motorhome caravan repair is offered for a suitable successor.

This very well-positioned company is located in East Westphalia with a fast connection to the motorway.

The vehicle interior is currently the main focus. Our client is the expert in vehicle coating and lines the vans individually – whether partial surface coating, hygiene expansion, fresh food or frozen food conversion. The vehicle coatings in the interior are particularly interesting.

In addition to vehicle coating, special installations such as a fixed partition wall, shelves or anti-slip devices are also no problem.

This company is not only known for the classic car painting, but also for the painting of large vehicles. The high halls are perfect for tall vehicles. This company also includes qualified specialists.
