Look for Franchise, license **Language school**

We are an 18-year-old language school based in Istanbul/Turkey.

We have founded a GmbH in Germany for 2 years and would like to give our customers a variety of opportunities to learn German directly in Germany.

However, we would like to do this with a strong partner at our side.

We have 75 students alone who will receive their visas to come to Germany.

The number of students is constantly increasing and we want to handle that ourselves.

We have a fully equipped school in , but we need a language school that contains all licenses to let customers from abroad run through his language school through the certificate of eligibility.

It is handled in our own language school and the partner company includes a commission for this.
