

## Offer Corporate sales, firm sales, sales

### **Hotel, apartments**

A location with extraordinary potential This offer opens up a wide range of perspectives: You take over a fully equipped operation with an ongoing lease and can generate income immediately. At the same time, the property offers considerable development potential – ideal for visionaries, investors or property developers. A second construction phase east of the existing holiday apartments was already approved in 1982. According to current planning law, this area is located in the outer area and in the landscape conservation area, but experienced project developers recognize the long-term possibilities here. The location speaks for itself: Only about 800 meters from the shore of Lake Constance, the property is located in the middle of one of the most popular holiday regions in Germany. The adjacent Lake Constance Cycle Path is one of the busiest cycle paths in Europe. We will be happy to provide you with further documents and information on request
