Offer Shell companies, Shelf company without operating **Automatic data processing and information technology**

We would like to sell our subsidiary as a shell company. We have ceased operations.

You take over an almost empty shell company and thus save the costs of founding a new company:

- No open liabilities
- No employment relationships
- No fixed assets
- Company headquarters will have to be changed after purchase

Under certain circumstances, you can also use the company's loss carryforwards for tax purposes: these will probably amount to around -€65,000 for 2 annual financial statements (still pending).

We look forward to your interest.
