Processing potatoes

Application for participation: Partnership in the field of potato processing

We are looking for an opportunity to invest in an existing or future potato processing company in north-west Germany or the Netherlands – preferably in the frozen goods sector.

As agricultural entrepreneurs, we have permanent access to large quantities of raw materials. We are striving for a strategic investment in order to jointly leverage value creation potential and to contribute the raw material base directly to further processing.

We are interested in both silent and active participation – depending on the size and structure of the company.

Interested companies or founders are welcome to contact us for a confidential discussion.
