## **Production of special machines and assemblies for medical technology**

Participation in precision assembly and plant production in Lower Bavaria

Innovative mechanical engineering company with a focus on medical technology and pharmaceuticals, modern machinery, strong customer relationships and great growth potential is looking for strategic partners.

Legal form: GmbH

Company headquarters: Lower Bavaria

### Profile:

The company's business purpose is the precision production of complex assemblies and complete systems in special machine construction.

A modern and dynamic company with comprehensive vertical integration.

The broad-based and very well-established company has long-standing customer relationships, state-of-the-art machinery without investment backlogs and excellent project references. The core market is now in the medical technology and pharmaceutical industries. The very high quality requirements have been confirmed by customers in extensive audits and certifications.
