Offer Corporate sales, firm sales, sales

Internet shop for canvas prints / photo wallpapers

As an experienced graphic designer (a little older), I prepare decorative images for homes, offices and wherever atmosphere and cosiness are important. I use image databases or my own photos and my own designs as sources. More than 1000 motifs are already fully prepared. There are already motifs for several more hundreds, so all you have to do is create more thumbnails.
The pictures (canvas, posters, photo wallpapers, aluminum composite) are to be sold in your own shop, on Etsy or wherever on the net.
The shop or shops must be created. For this purpose, I am looking for a programmer for WooCommerce (or similar) to install the shop, upload the images, constantly maintain the shop structure and advise on/and carry out suitable IT advertising measures.
The partner should be well versed in selling via online media and operate the best strategies.
