## **Potted herb production**

Our farm, located on the grounds of the Malzfabrik, forms the origin of our herb production and serves as an operational center until the new farm is put into operation.

The farm is located on a green area within the sprawling campus of Malzfabrik in Tempelhof-Schöneberg. The area is considered one of the most exciting transformation locations in the city and combines industrial history with modern creative industries, sustainable projects and innovative forms of production. The farm is clearly visible and conveniently located on the southern part of the Malzfabrik " with direct access for delivery traffic and a short distance to the city's main traffic axes.

The facility includes a modern, modular production farm that has been specially developed for the combined cultivation of plants and fish.
