Look for Corporate financing, investor

IT Modernization

In addition to the large financing, there is also the possibility of a smaller investment. The conditions would be the same here in any case. An investment would be possible in the range between €40,000 and €140,000. After a short term of 2-3 months, there is 10% interest and full repayment. This volume would be fully covered by accepted invoices, which, however, come late due to the payment deadline of 60 days. We don't want to let the time pass unused until then. But we can only continue to work with these funds now. Contact us for other suggestions.
