Offer Liquidation, Operating dissolution

Metal Processing / Tool Making / Injection Molding

For private reasons, the machinery of an established manufacturing company near Frankfurt am Main is for sale.

The range includes several CNC machining centres, mainly 5-axis machines, wire EDM and die-sinking EDM machines, systems for metallic 3D printing, injection moulding machines, measuring and testing technology, conventional machines as well as extensive hand and power tools including operating equipment. In addition, it is possible to take over existing CAD/CAM workstations (e.g. with systems such as Siemens NX, Visi and WORKNC) after individual clarification with the respective manufacturers.

On request, contacts to a long-standing customer base can also be handed over after consultation. The offer is aimed in particular at companies that want to expand their machinery in a targeted manner, or at companies in development that are looking for immediately productive equipment.
