Beauty School

Beauty school with established training concept, founded in , is offered for sale due to age-related reasons. A serious successor or alternatively a partnership is sought.

The business provides training and practical services in the fields of classical, modern, and holistic cosmetology as well as medically oriented foot care. An AZAV certification is in place, allowing participants to receive government-funded training support. The certification is regularly renewed (approximately every 3–4 years).

The existing concept is scalable and offers strong potential for further development, particularly through remote/online training as well as expansion into a cosmetic studio.

Currently, participants are also trained via online lessons (e.g. video conferencing). There is an established and stable base of approximately 200 students per year.

Optionally, a comprehensive IT concept for the digitalization of training materials can be acquired. This concept has already been developed but not yet fully implemented.

An established online presence and positive customer feedback ensure continuous demand.

The business is active across several regions within Germany.
