

The big business marketplace

Business for sale more than 15 years

ID 26962

Offer Corporate co-operation, firm cooperation

Software Solutions

Investments, takeovers or succession solutions with a long-term perspective.

Based on many years of experience, the company offers consulting and software development services in the field of generative AI as well as its own modular AI platform. Customers receive individual applications and managed services for data management, either project-based or using existing solutions (e.g. LLM/ML). The focus is on process optimization and AI integration. The clientele mainly includes public clients and large companies. The team comprises around 40 employees in southern Germany.
