Organization of Padel Tennis Leagues

Established padel league system with currently 9 leagues and around 350 active players for sale. The offer includes an existing, active community as well as a functioning organizational structure.

The annual profit is currently around €12,500 with very low running costs. Organization is done efficiently through digital tools (including messaging groups and spreadsheet solutions) and can be seamlessly adopted by the buyer.

The model is based on regularly organized games within the leagues and ensures a high level of activity and loyalty among the participants. The community has grown and is stable.

The offer is particularly suitable for operators of sports facilities, service providers in the leisure sector or entrepreneurs who want to take over and further develop an existing system.

There is potential for growth, among other things, through expansion to other locations, additional leagues or supplementary offers.
