Ambulance service / rental car company

For health reasons, a still small but structured rental car company with a focus on ambulance rides and an existing concession in the rental car business is being sold. The company is mainly focused on transporting patients in wheelchairs, stretcher chairs and couches. Almost 100% of the journeys made are made by these non-sedentary modes of transport. These services are provided with vehicles specially equipped for this purpose and are treated exempt from VAT in the company in accordance with sec. 4 letter b of the German VAT Act. This represents an additional economic advantage of the existing corporate structure. In addition, seated transport such as school transport, trips to day care and similar services are also possible.
