Taxi and rental car

Establishment of a taxi and taxi company

I am looking for a committed investor or strategic business partner to finance and co-develop a planned taxi and taxi company in Germany.

The aim is to establish a modern, reliable and economically viable passenger transport company with a focus on taxi and transport as well as supplementary transport services.

Business Concept

The plan is to establish a flexible mobility service provider in the following areas:

- classic taxi transport within the framework of the legal requirements
- Transport on pre-order in accordance with the Passenger Transport Act
- Ambulance and transport trips (e.g. doctor's, rehabilitation and dialysis trips)
- Contract trips for companies, institutions and organisations
- Individual passenger transport for private and business customers

The focus is on reliability, predictability and a professional, customer-oriented chauffeur service.

Participation
