## **Established Metal Fabrication And Powder Coating Company**

Production Facility with Expansion Potential in Southern Hungary – Established Industrial Company Including Real Estate for Sale

For sale is an established manufacturing company in Southern Hungary with its own industrial property, existing customer base, qualified employees, and modern production and manufacturing facilities.

The company operates in the fields of powder coating, metal fabrication, and the design and manufacture of industrial coating systems. It is offered as a fully operational production facility.

The property comprises approximately 1,900 m<sup>2</sup> of land and includes:

- Metal fabrication and production workshop
- Powder coating and painting facility
- Office and administrative areas
- Employee welfare and social facilities
- Production and storage areas

In addition, the adjacent neighboring property can be acquired, providing further opportunities for expansion of production and storage capacities.

The machinery and equipment include, among others:

- Modern powder coating line
- CNC plasma cutting machine
- Press brake equipment
- Welding equipment
- Manufacturing and assembly facilities for steel structures and industrial systems

Scope of services:

- Powder coating of steel and metal components
- Manufacturing of steel and metal structures
- CNC plasma cutting
- Welding and fabrication services
- Design, manufacture, and installation of industrial painting and coating systems

The company benefits from an established customer base, well-organized operational processes, and qualified, experienced employees. The facility allows for immediate continuation of production without the need for lengthy permitting procedures, construction

projects, or start-up phases.

This opportunity is particularly attractive for companies from Germany, Austria, or other European countries seeking to expand their production capacity or establish an additional manufacturing base in Central Europe.

Location advantages:

- Competitive labor costs compared to Western Europe
- Attractive local tax environment
- Convenient access to Austria, Germany, and Central European markets
- Immediately available production capacity
- Existing infrastructure and qualified workforce
- Expansion potential through additional adjacent land

Further growth opportunities include:

- Expansion of powder coating capacity
- Development of metal fabrication operations
- Increased export activities
- Acquisition of new customers and entry into new markets

The current owner is available for a structured handover period of up to two months. During this time, introductions to customers and suppliers, as well as the orderly transfer of operational processes, will be provided.

Sale includes the industrial property, machinery and equipment, existing operational structure, and customer relationships.

Asking Price: EUR 490,000 (negotiable)

Further information, financial data, and site visits are available following the signing of a confidentiality agreement.
