Offer Corporate sales, firm sales, sales

Online retail for dog supplies, focus on health

For sale is a great online shop for dog supplies. It sets itself apart from the masses by its focus on the topics of safety and health.

Due to the online business, there are no regional borders.

No dropshipping.

Handmade collars and leashes, some dietary supplements made in Germany, brand listed at the patent office, ID brands that can be personalized by fiber laser and and and.

In Focus 2 first aid boxes that are also market leaders on Amazon.

Why is it being sold?

After initial problems new to the market, we managed to generate regular four-digit sales on Amazon,...

Regular customers with food...

But we have a second shop.

We can't do justice to both.

And there is still so much potential here

So if you want to take over an online shop known on social media with parallel sales via Amazon and your own webshop with regular income, you've come to the right place.
