Training Provider for Professional IT Education

An established AZAV-certified training provider specializing in professional IT training is offered for acquisition due to a strategic realignment. The company holds an AZAV provider certification as well as an approved training program and has been successfully delivering live online training courses since 2022. The business includes a professional Learning Management System (LMS), virtual IT laboratories, an extensive library of digital learning content, and fully digitalized business processes. Its scalable nationwide business model makes it an attractive opportunity for existing training providers, IT education companies, or investors looking to expand their education portfolio or enter the growing market for publicly funded professional training in Germany.
