Aluminium Casting Repair

For sale: a highly specialized company established for more than 15 years in the automotive supply sector, headquartered in Thuringia with a satellite site in Baden-Württemberg. The company is one of only a few certified providers nationwide for the demanding repair and refinement of aluminium casting components (gearbox housings) using an innovative two-component sealing process.

Service portfolio: sealing (gearbox technology), casting cleaning/deburring, sandblasting, quality control, sorting and rework services, storage, logistics.

Key figures: revenue in the seven-figure range, growing significantly; EBITDA margin above average and highly profitable (approx. 25-30%); single-digit to low double-digit skilled workforce; certified to ISO 9001: with a very low complaint rate.

Stable, long-standing business relationships with globally leading automotive suppliers, an extreme niche position with high barriers to entry for competitors, strategically favorable locations near key European automotive clusters.

Sale of 100% of the shares, with a handover/transition period of up to 6 months supported by the outgoing shareholder.
