

Offer Corporate sales, firm sales, sales

Airport Parking Operator

An established and profitable company with a strong reputation in the airport parking sector is offered for sale, located within the immediate catchment area of a major international airport in the Rhine-Main region.

The company's core business is highly specialised in a convenient valet parking service, including vehicle collection and return directly at the airport. In addition, secure parking spaces on leased premises are operated. The premises themselves are not included in the sale. Two lease agreements are in place for parking spaces located directly at the airport.

The company has a fully operational digital booking platform, a solid base of returning customers, and well-established operational processes. The business will be transferred together with its established web infrastructure.

Ideal for investors, for the strategic expansion of an existing business, or for entrepreneurs looking to start their own business with an already successfully operating business model.
