Look for Corporate participation, firm participation

Solarfences

We are looking for an investor for a new product. Solar fence systems cost about 50% of conventional roof systems with the same performance. We build very unique models in stone finishes like granite, marble, or terracotta at a very affordable price. As a startup, we are looking for €500,000 as an equity investment or loan. The market opportunities are very large, especially with ever-increasing energy prices. Please, serious inquiries only.
