

## Offer Free cooperation, Freelancer **Carpentry**

We are two joiners who will be self-employed this year. We are interested in potential clients from industry, design and architecture. Our goal is to continue the classic craftsmanship business, but we want to deal with new tasks. We think that the craft has a good breeding ground for ideas and in this sense designers and architects or even industrialists want to realize the ideas. Since our company is still young, we unfortunately do not yet have the possibility to offer a CNC production. But we think CNC manufacturing will not be the right solution in all areas. In doing so, we think above all of the individuality of a product and its added value.

If you are interested in contacting us, you can do so via our homepage or the address.
