Look for Corporate participation, firm participation

Gastronomy

For a highly innovative and bank-tested catering concept, I am looking for an active partner for the restaurant sector with 120 T€ own funds.

The food combines the positive characteristics of fast food (fast), convenience food (comfortable) and natural functional food (healthy) with the main attributes: diverse, fine taste, high health value, inexpensive, fast.

The implementation takes the form of a multipliable regional model. The first region is the Central Region of Upper Austria, where the pilot project also took place.

Participation

Region , Germany

Entry
