## **Gastronomy concept and special wine and food trade**

A partner with capital is sought for a gastronomie concept that has not yet been developed in the Cologne area and the import of wines and specialities, as well as their marketing. The concept is based on wines and specialities that are hardly available on the market. With this concept I could imagine running a catering business with special shops, if necessary also with an internet shop. Since I am currently lacking capital due to unforeseen business trials, I am looking for an active or silent partner who is willing to invest in this concept.

The capital requirements depend on the size and form of the implementation of the concept.

Information and contact address by request.
