## Look for Corporate financing, investor **Portal**

In a few Days – more precisely between 03-15 12., we will be releasing – some Internet Portals, which complement existing Portals, respectively. Offer services with brand new Content.

For reasons of data protection and competition law, we do not wish to go into this in more Detail at this stage.

According to our Research worldwide, however, we can expect a very positive Development of this Business Idea. The Concept is not regionally bound and also uses existing Customer Strains from other Providers. Thus, as with other Products, user Structures do not have to be created and rebuilt, but some of them are made use of them.

The current Providers will not be able to cover certain Areas and will not be able to do so in the future through our new Software and our Concept. Our System closes this Gap, to the Detriment of current Providers. A risk-prone investor or investor is therefore being sought.
