Look for Corporate financing, investor

Service providers Companies with five employees or more

As a franchisee of a business concept (service provider for companies with 5 or more employees), I am looking for an investor. The franchisor is successfully represented in Hamburg with the company concept. Other companies with a similar concept are also successfully on the market in some cities (Bremen, Hamburg). According to my research, there are a maximum of 1 company in the Berlin/Brandenburg area (internet presence has not been accessible for weeks) that is represented in this direction. On the basis of proven figures and my prepared income and figures, sales of more than 3,000 euros are possible within 6 months.

In order to be able to start successfully, investments are needed, especially in warehouses, and costs for advertising are also incurred. The capital requirement is 7,500.00 - 10,000.00 Euro! Further information on the company concept can be obtained from request!
