## Look for Corporate participation, firm participation **Science and Medical services**

Seeking Investors and Support for the Expansion of science and Medical Services:

What it's all About:

Building on a Feasibility Study, the Prototype of a Software was developed that allows for a Kind of 3D visualization and Modeling. The Application is mainly in the Field of Biosciences and medical Diagnostics.

The Aim is to create a marketable Product from the Prototype and to develop its own comprehensive Range of Services.

To Do this, Investments are needed for:

- (1) Software implementation (i.e. 1-2 Software developers)
- (2) Medical Diagnostics devices (Microscopes, high-resolution Digital Cameras, Cryostats and Vibratoms)

The required Investment Volume lies between  
€50,000 and €250,000.

Participation as silent or active Partners.
