Hello, we are an ISP specializing in customized and scalable Server Solutions for Business Customers. From normal Colocation to Clusters and Load Balanced Solutions to various Management and consulting Activities, we offer almost everything related to Data Centers and Servers.

We are still relatively Young but have earned everything we have now. We have well-known Customers who are happy to recommend us.

In order to expand our Liquidity, we need Capital from around 15,000 Euros would be optimal would be 25,000 Euros

For The time being, we would like to invest in our Equipment (for example, we are currently building our own Backbone, etc.)

After KFW has changed its Funding Conditions and we now fit into the Grid, we are now looking for a Guarantor. We are interested in the KFW Micro-loan. Business Plan and BWA is in place. The possible Participation or compensation for the Guarantor Is possible to be talked about.
